

US MAC Client Progeniq Launches RenderBoost Accelerated Engines for CGI / VFX Animations

Progeniq Pte Ltd, a leader in reconfigurable computing applications, today announced the availability of RenderBoost Accelerated Engines for the CGI / VFX Animations industry, offering over 10x speedups for computationally intensive algorithms such as bkdTree Traversal, in a single low-cost accelerator that can scale up as computational requirements increase to offer computational power equivalent to over a hundred 2.4GHz CPU cores in a single 1U server.
